INTELLIGENT SOCIAL MEDIA

Secure Collaboration.
Any Platform. Anywhere. Any Time.

Why ISM?

ISM is an integrated collaboration platform built with a security-first mindset that is both platform and device agnostic. With realtime activity feeds, rich media sharing, ad-hoc groups, and live video comms that span mobile and desktop simultaneously, your critical training and operations functions can exist across disciplines and geographies.

Security-First Mindset

Partnered with the Speed School of Engineering at the University of Louisville, KY, ISM has developed some of the strongest, most stringent security protocols in the industry. Unlike most competitors, ISM does not sell user data, nor mine user interactions for manipulative engagement and profiling.

Leveraging the power of AWS GovCloud, multifactor authentication and best-in-class privacy protocals, ISM provides security that far outpaces its peers.

Ahead of the Pack

Built with human-centered design and an operational mindset, ISM's communcation platform provides crisp HD video, interactive chat and file sharing without the security concerns of **Zoom**, **WhatsApp**, **Teams** or **GroupMe**.

With industry-standard encryption protocals, communication securitys are on par with **Signal** but without compromising privacy.

While we maintain rich business intelligence on existing and emerging communication/collaboration tools, the ISM platform offers a comprehensive and secure package that is truly peerless.

Real-World Ready

ISM GO Capabilities
(Secure communication web/mobile):
- Channels with up to 250 members
- Video/Voice Calls for up to 50 concurrent users
- Broadcasts for up to 1000 users
